MINI PROJECT OBJECT:

The purpose of this project is to primarily provide a completely digital mode of railway ticket booking and eventually eliminate the hassle of paperwork and manual labour and effort gone through getting it done. We aim at fulfilling a purpose of completely digitalized and hassle-free railway travel, that is not only minimal in terms of effort and time, but also wholesomely resulting in keeping the user constantly notified and updated regarding almost all aspects with respect to railways.

MAIN PROJECT OBJECT:

- The objective of face recognition is, from the incoming image, to find a series of data of the same face in a set of training images in a database.
- The great difficulty is ensuring that this process is carried out in real-time, something that is not available to all biometric face recognition software providers.
- OpenCV uses machine learning algorithms to search for faces within a picture.
- The faces are so complicated, there isn't one simple test that will tell you if it found a face or not. Instead, there are thousands of small patterns and features that must be matched.
